

Crawford County Wisconsin Mortality Schedules

1850 - 1880

**Transcribed by David W. Taft

Introduction

Notes:

The mortality schedule was "supposed" to list those who died between June 1, 1849 and May 31 1850, while the population schedule was to list those actually living in the residence on June 1 1850, no matter what day the enumerator actually took the information. I understand that in some cases the enumerator may have been careless asking the question, or the informant didn't understand it, and there may be occasions when an individual may be found on both the mortality schedule and the population schedule. If the mortality schedule says someone died in July, it should mean July 1849, although it could have been July 1850. (This same principle is applicable to the 1860 - 1880 Mortality Schedules as well)

The cause of death includes diseases that are now known by other names. An example is "Gravel" which is now referred to as "Kidney Stones." For help in deciphering these disease names, there are numerous genealogy web sites that can be accessed at Cyndi's List - Medical and Medicine page: <http://www.cyndislist.com/medical.htm>

While most of the microfilm was legible, some pages were extremely faded. As with any old handwritten records, handwriting can be very problematic. When questionable names were encountered, I utilized other sources, such as the census Population Schedule indexes for clues. If nothing could be located, I included a question mark (?) next to the data.

When looking for a particular name, the researcher should try several spelling options. Potential problems exist with certain letters in the script such as S-L, H-K, M-N-W, p-f, n-m-r-u, o-a, etc. As with census records, the first and last names were spelled as the recorder thought they should be or how they sounded to him or her. An example would be Stevens and Stephens.

In the majority of cases, I have recorded the names as spelled in the original records. I shall leave the interpretation of the proper spelling to reader rather than taking potentially incorrect liberties myself.

These transcripts should never be used to substitute for the original records. No matter how carefully done, errors are always possible. If the record looks questionable, you should request a copy of the original schedule.

To make review of these records easier for the researcher, I have added town/township and page columns and sorted the individuals by last name.

The 1850 Mortality Schedule contained eleven columns of data.

Column 1: Name of every person who died during the Year ending 1st June, 1850.

Column 2: Age at time of death

Column 3: Sex

Column 4: Colour (White, Black, or Mulatto)

Column 5: Free or Slave

Column 6: Married or Widowed

Column 7: Place of Birth

Column 8: Month Died (June 1849 - May 1850)

Column 9: Profession, Occupation, or Trade

Column 10: Disease, or Cause of death

Column 11: Number of days ill

Introduction

The 1860 Mortality Schedule contained eleven columns of data.

Column 1: Name of every person who died during the Year ending 1st June, 1860.
Column 2: Age at time of death
Column 3: Sex
Column 4: Color (White, Black, or Mulatto)
Column 5: Free or Slave
Column 6: Married or Widowed

Column 7: Place of Birth
Column 8: Month Died (June 1859 - May 1860)
Column 9: Profession, Occupation, or Trade
Column 10: Disease, or Cause of Death
Column 11: Number of days ill

The Color and Free/Slave columns are blank throughout, and have been excluded from this transcript.

The 1870 Mortality Schedule contained twelve columns of data.

Column 1: Family # given in the 2nd column of the Population Schedule
Column 2: Name of every person who died during the Year ending 1st June, 1870.
Column 3: Age at time of death
Column 4: Sex
Column 5: Color (White, Black, or Mulatto)
Column 6: Married or Widowed

Column 7: Place of Birth
Column 8: Father of Foreign Birth
Column 9: Mother of Foreign Birth
Column 10: Month Died (June 1869 - May 1870)
Column 11: Profession, Occupation, or Trade
Column 12: Disease, or Cause of Death

The Color column is generally blank throughout, and has been excluded from this transcript.

The 1880 Mortality Schedule contained twelve columns of data.

Column 1: Family # given in the 2nd column of the Population Schedule
Column 2: Name of every person who died during the Year ending 1st June, 1870.
Column 3: Age at time of death
Column 4: Sex
Column 5: Color (White, Black, or Mulatto)
Column 6-8: Married, Widowed or Single
Column 9: Place of Birth
Column 10: Father's Place of Birth

Column 11: Mother's Place of Birth
Column 12: Profession, Occupation, or Trade
Column 13: Month Died (June 1869 - May 1870)
Column 14: Disease or Cause of Death
Column 15: How long resident of the community
Column 16: Where disease contracted if not in the county
Column 17: Name of attending physician

Due to space restrictions and/or lack of information, columns 15-17 have been excluded from this transcript.

Enumerator Remarks:

Clayton: Very Healthy during the year ending 1st June 1870. Quite a number of deaths since, especially among children. Cholera Infantum to considerable extent. Country rough and broken, good water and generally very healthy.

Prairie du Chien: Edward Luby, Murdered in the Street, in Chicago, on Madison Street Bridge.

Wauzeka: Julius Philip's cause of death was the result of an accident 5 years before.

1880 Crawford County Wisconsin Mortality Schedule

Fam #	Last Name	First Name	Age	Mar/ Wid	Place of Birth	Father's Birth	Mother's Birth	Occupation	Month Died	Cause	Town/Twp.
--------------	------------------	-------------------	------------	---------------------	-----------------------	-----------------------	-----------------------	-------------------	-------------------	--------------	------------------

Enumerator Remarks:

PR = Deaths recorded based on Physicians Reports.

Clayton: The deaths reported above all occurred in this enumeration district and the families all resided in the district on the 1st day of June 1880.

Freeman: In the cases of Nos. 5 (James Parker), 6 (Ellen Parker), 8 (Sarah McQunny?) and 9 (Annie Olsen) reported on the schedule there is no family remaining. In cases of 4 (Alek Botton), 8 (Sarah McQunny?), 10 (Rachael Galt) and 14 (Andrew Johnson) as reported it is impossible to even guess at what caused the deaths. As one of the physicians lives some 30 miles from me it is impossible to get his opinion and the other knows but little more about it than any one does. Nos. 5 (James Parker) and six (Ellen Parker) are reported as dying with old age, I am unable to guess at any other cause unless 2 and it?? it to the attending physician.

Haney: Physician that attended no. 1 (Lydia Alderman) above is dead. On line 10 (Not Named) was the illegitimate child of the woman on page 11 line 32. Was living at the time of its birth with her father and mother, page 3 line 16. Dr. Slover of this district reports no list of deaths kept. Line 2 the family lived out of the town at the time of the death of the child, moved in this town since.

Town of Prairie du Chien: No. 3 (Sarah Foran) had not time as he etatice? to me. No. 5 (Frank Ting/Ping) accidental shooting he died? nearly instantly, did not speak often? the shot. No. 4 (Antoine Salone), 6 (Joseph Godfooy), 7 (Adaline Cayan) Dr.? Fordet? the attending physician had left here.

1st Ward, Prairie du Chien: Charles Lantry died in Santa Fe, New Mexico.

3rd Ward, Prairie du Chien: No. 3 Michael Skelly has been for many years a common and habitual drunkard. No. 12 John G. Bosch died of old age on the day of his death he walked a little complained of ??, layed down to rest and quietly died without a struggle.

Prairie du Chien: Etta Eldredge died in Mankato?, Blue Earth Co., Minnesota. Supplemental is listed as S. D. No. 3, Enumeration District No. 68, Ohio. Thomas Pears died in hospital.

Scott: All those that have died during the census years was settlers of the town in which they died in.

Seneca: George Prince's name was crossed out with not further notes.

Utica: Ella Smith crossed out without further notes.

Wauzeka: Mary Horkheimer's name was crossed out; she is listed as dying in Madison, Dane Co., WI. Orville Row's family was listed as being residents of Finley, Turner Co., Dakota Territory.
